## SUMMARY

Computer Science student at UCP with hands-on experience building full-stack web applications using Django, React, FastAPI, and Next.js, and integrating LLMs into AI-powered, agentic workflows. Also skilled in Unity and Blender, with a background in game development and 3D design.

## EXPERIENCE

**AI Intern (Remote) — Arbisoft**
June 8, 2026 – August 7, 2026

- Built full-stack web applications using Django and React
- Learned about MCP, embeddings, and LLMs, applying that knowledge to integrate LLMs into applications and build agentic workflows

## EDUCATION

**University of Central Punjab (UCP), Lahore**
Bachelor's in Computer Science
Sep 2023 – Sep 2027

**GOVT. Degree College for Women, Lahore**
Intermediate (ICS / FSc)
Oct 2020 – May 2022

## PROJECTS

**Savora — Completed · Deployed**
A restaurant web system built with a Django backend and React frontend, letting users browse menus and make table bookings. (Django, React, Full Stack, REST APIs)

**OLX Clone — Completed · Deployed**
A full-stack marketplace application with a Django backend and React frontend. Implements authentication, product listings, search, and CRUD operations backed by a relational database. (Django, React, Full Stack, REST APIs)

**Competitive Intelligence Monitor — Completed · Deployed**
A dashboard that tracks competitors' websites, pricing, and updates, surfacing the findings in a live, easy-to-read view. (Next.js, Dashboard, Data Visualization, Web Scraping)

**Unity Game Development**

- Developed multiple games in Unity: a 3D endless runner, an FPS shooter, and a 2D game
- Implemented core mechanics: player movement, shooting, obstacles, scoring, and UI

- Worked with physics, animations, and collision systems, focused on smooth gameplay and performance optimization

**3D Environment Design (Blender)**

- Created 3D models and environments for games, designing both realistic and stylized assets
- Integrated 3D assets into Unity projects

**Library Management System**

- Built a system for managing book inventory, issuing, and returns, with an optimized database schema in MySQL
- Implemented features for tracking availability and user records for efficient data retrieval and management

---

## SKILLS

**Programming Languages:** Python, C++, C#, Java, SQL

**Full-Stack Web:** Django, React, FastAPI, Next.js

**AI & LLMs:** LLM Integration, Embeddings, MCP, Agentic Workflows

**Cloud (AWS):** EC2, EKS, CloudFront, DynamoDB, API Gateway, S3, CloudWatch

**Game Development:** Unity, Game Mechanics, Scene Design

**3D Design & Tools:** Blender, 3D Modeling, Environment Creation

**Other Technologies:** Firebase (Basic), UI/UX Fundamentals
