SUMMARY

Computer Science student at UCP with hands-on experience building full-stack web applications using Django, React, FastAPI, and Next.js, and integrating LLMs into AI-powered, agentic workflows. Also skilled in Unity and Blender, with a background in game development and 3D design.

EXPERIENCE

ML Intern (Remote) — Arch Technologies

Sep 2026 – Nov 2026

- Developed and evaluated machine learning models using Python, NumPy, Pandas, and Scikit-learn.
- Explored neural networks and deep learning with PyTorch.
- Worked on NLP tasks including text classification, embeddings, and transformers.
- Gained exposure to LLM application development, RAG pipelines, and vector databases.

AI Intern (Remote) — Arbisoft

Jun 2026 – Aug 2026

- Built full-stack web applications using Django and React.
- Learned about MCP, embeddings, and LLMs, and applied that knowledge to integrate LLMs into applications.
- Built agentic workflows.
